**DETAILED ACTION**

1. Claims 1-20 are pending.

***Election/Restrictions***

2. This application contains claims directed to more than one species of the generic invention. These species are deemed to lack unity of invention because they are not so linked as to form a single general inventive concept under PCT Rule 13.1.

The species are as follows:

**List I: Order of the Method Steps**

- A. Step c) takes place before step b)
- B. Step c) takes place after step b)

**List II: Induction Step**

- A. Adding to a microorganism's enrichment medium at least one non-fluorescent substrate specific to enzymes
- B. Adding to a microorganism's enrichment medium yeast extract

**List III: Fluorogenic Label**

- A. Xanthenes
- B. Acridines
- C. Phycobiliproteins
- D. Cyanine
- E. Esculin

**List IV: Substrate**

- A. Fatty acid
- B. Monosaccharide
- C. Phosphate
- D. Sulfate

**List V: Fluorescence Detection Technique**

- A. Flow cytometry
- B. Filtration cytometry
- C. Fluorescence microscopy

Applicant is required, in reply to this action, to elect a single species to which the claims shall be restricted if no generic claim is finally held to be allowable. The reply must also identify the claims readable on the elected species, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered non-responsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

The claims are deemed to correspond to the species listed above in the following manner:

List I: Order of the Method Steps (claim 6)

- A. Step c) takes place before step b)
- B. Step c) takes place after step b)

List II: Induction Step (claims 4-7)

- A. Adding to a microorganism's enrichment medium at least one non-fluorescent substrate specific to enzymes (claims 4-6)
- B. Adding to a microorganism's enrichment medium yeast extract (claim 7)

List III: Fluorogenic Label (claim 12)

- A. Xanthenes
- B. Acridines
- C. Phycobiliproteins
- D. Cyanine
- E. Esculin

List IV: Substrate (claim 13)

- A. Fatty acid
- B. Monosaccharide

Art Unit: 1641

- C. Phosphate
- D. Sulfate

List V: Fluorescence Detection Technique (claim 14)

- A. Flow cytometry
- B. Filtration cytometry
- C. Fluorescence microscopy

The following claim(s) are generic: claims 1-3, 8-11, and 15-20.

The species listed above do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, the species lack the same or corresponding special technical features for the following reasons: Each species includes mutually exclusive characteristics and therefore lack the same or corresponding special technical features.

3. Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention or species may be made with or without traverse. To reserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.

Should applicant traverse on the ground that the inventions or species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the inventions or species to be obvious variants or clearly admit on the

record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C.103(a) of the other invention.

4. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

5. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Unsu Jung whose telephone number is 571-272-8506. The examiner can normally be reached on M-F: 9-5.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Long Le can be reached on 571-272-0823. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
